PROFILE SUMMARY

Computing undergraduate at the University of Sri Jayewardenepura with hands-on, cross-functional exposure to quality assurance, requirements analysis, and applied machine learning through coursework and group projects. Comfortable moving between testing, data-driven feature development, and front-end implementation, with a growing focus on healthcare informatics through an ongoing research project on ontology-based clinical decision support. Reliable in collaborative, deadline-driven academic team settings and quick to pick up new tools and APIs as a project demands.

TECHNICAL SKILLS

- **Languages & Markup:** Java, Kotlin, JavaScript, HTML, CSS, Python
- **Tools & Platforms:** Jira, Postman, Microsoft Azure, Git/GitHub, Android Studio, Streamlit, Unity, NetLogo, Swagger/OpenAPI, REST API, Figma, Excel, Word, Draw.io, BPMN
- **Core Competencies:** Quality Assurance & Manual Testing, Requirement Analysis, Applied Machine Learning, API Integration, Developing Multi-agent systems, Test case design and execution, Bug identification and reporting, User Acceptance Testing (UAT), Basic knowledge of Agile and Scrum

EDUCATION

Bachelor of Computing Honours in Information Systems

2023 - Present

Faculty of Computing, University of Sri Jayewardenepura, Sri Lanka

G.C.E. Advanced Level Examination(Physical Science Stream)

2021/2022

Central College, Anuradhapura

ACADEMIC PROJECTS

Univize Group Project

[Univize](#)

Social Media Platform for University Students — QA Tester

- Authored and executed test cases across 11 application screens to verify functionality, usability, and bug-free performance ahead of release.
- Collaborated with developers to log defects and confirm fixes, supporting a smoother and more reliable user experience.

UniCollab Group Project

[UniCollab](#)

Task Manager Mobile App for University Students

- Contributed to building a mobile task management application aimed at helping university students organise coursework, deadlines, and personal tasks in one place.

Sentiment Analyser Group Project

[SentimentAnalyser](#)

Reddit API & AI-Based Sentiment Analysis Tool

- Integrated Reddit's API to collect real-world discussion data and applied AI-based sentiment analysis to extract and classify opinion trends.

Cancer Cell Tumor Growth Simulation Individual Project

[Streamlit](#)

Complex Systems & Agent Technology — NetLogo, Random Forest, and Streamlit

- Built a NetLogo simulation of tumor cell growth and exported behavioural data through BehaviorSpace for downstream analysis and trained a Random Forest classifier on the simulation data and deployed it as a live Streamlit app on Streamlit Community Cloud, completing the full pipeline from simulation to deployed model with no prior NetLogo or Streamlit experience.

Traffic Congestion & EV Charging Station Simulation

[EV-Traffic](#)

Complex Systems & Agent Technology — NetLogo, ML, and Streamlit

- Extending NetLogo's Traffic Grid model with EV-specific logic, including charging stations, battery levels, and charging behaviour, to study how station placement affects congestion.
- Added configurable simulation parameters (EV percentage, number of charging stations, charging bays) ahead of training a predictive model on the simulation output and deploying it as a Streamlit app.

Breast Cancer Clinical Decision Support System (Ontology-Based)*Ongoing*

Final Research Project

- Designing a context-aware clinical guidance and care navigation model for early breast cancer detection and referral support, tailored to the Sri Lankan healthcare context.
- Applying Design Science Research methodology across systematic review, ontology development (symptoms, risk factors, referral pathways), CDSS design, prototype implementation, and evaluation stages.

RESEARCH & PUBLICATIONS

Systematic Review of Ontology-Based Clinical Decision Support Systems for Breast Cancer Care

J'PURA Computing Symposium (JCoS) 2026 | Published & Presented

CERTIFICATIONS & TRAINING

Google Analytics Certification

Google

Web Design for Beginners

Centre for Open & Distance Learning (CODL), University of Moratuwa

Python for Beginners

Centre for Open & Distance Learning (CODL), University of Moratuwa

Azure: create a REST API using NodeJS Serverless Functions

Coursera

Introduction to Playwright

Applitools

API Test Automation with Postman
